## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
'data.frame': 16065 obs. of 6 variables:
 $ disease      : Factor w/ 7 levels "Hepatitis A",...: 1 1 1 1 1 1 1 1 1 1 ...
 $ state        : Factor w/ 51 levels "Alabama","Alaska",...: 1 1 1 1 1 1 1 1 1 1 ...
 $ year         : num 1966 1967 1968 1969 1970 ...
 $ weeks_reporting: num 50 49 52 49 51 51 45 45 45 46 ...
 $ count        : num 321 291 314 380 413 378 342 467 244 286 ...
 $ population   : num 3345787 3364130 3386068 3412450 3444165 ...
```

## Measles

speed	dist
Min. : 4.0	Min. : 2.00
1st Qu.:12.0	1st Qu.: 26.00
Median :15.0	Median : 36.00
Mean :15.4	Mean : 42.98
3rd Qu.:19.0	3rd Qu.: 56.00
Max. :25.0	Max. :120.00

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
